

LaceIT™ Products

301 Corset

(Double Mesh Support LSO)

Indications for Use

Acute and chronic low back pain resulting from various spinal conditions. Lightweight design and durable construction ensures patient support and confidence with everyday activities such as long periods of standing, various sports, gardening, lifting and work related movement.

Key Features and Benefits

Mesh Design

- Provides circumferential air circulation
- Durable construction ensures customer support and confidence

Pull Lace Design

- Provides smooth circumferential closure for the customer without sacrificing comfort and compliance.
- Eliminates unwanted rotational movement.
- Reduced pulling range to achieve abdominal compression.
- One second pull adjustment provides increased support.
- Effortless donning and offing with instant full range modification while maximizing support of anatomical structures required for indication of use.

X640 LSO

(401 LSO, X641 LSO, X650 LSO, Attachments)

Indications for Use

Acute and chronic low back pain, pre- and post-surgical support in the lumbar region of the spine, resulting from an assortment of spinal conditions caused by degenerative changes or maldevelopment as well as use as a post-operative lower lumbar support. The LaceIT LSO rehabilitates muscles while relieving pain. The LSO comfortably relaxes muscle spasms, prevents or retards muscle atrophy, maintains, or increases range of motion, which may significantly increase the healing rate.

Key Features and Benefits

Three components in one LSO assist with the pre- and post-operative treatment of the spine:

Multi-plane Low Profile LSO
